

## Henry J. Morley, PMP

Henry is the Managing Partner in Grand Rapids for DPT. He has more than 20 years of combined Project/Program Management, Business Process Management, Manufacturing Engineering, and Business Consulting experience. He specializes in driving measurable results and client success by taking a systematic business driven approach to deploying technology solutions. He assists clients with project and/or program management, identifying and deploying business process enhancements, utilizing data management and business intelligence tools, and leading performance improvement projects. Henry has exceptional communication and analytical skills with an excellent grasp of business analysis, cross-functional team facilitation, project management, and strategy development methodologies.

### Professional Experience

#### *Project/Program Management and Business Process Management Consultant*

Responsible for leading, managing, and quality assurance on a variety of technology development and deployment initiatives focusing on business process and requirements definition, software/technology selection, and change management. Works with client initiative sponsors to ensure alignment with business strategy and vision, identify appropriate success measures and potential obstacles, and effectively communicate with business stakeholders. Leads cross functional teams of subject matter experts and focuses on development and delivery of strategy, technology, and operational solutions. Specializes in the areas of business strategy alignment, business process management, project management, business risk assessment/reduction, and change management.

#### *Supply Chain and Strategic Sourcing Consultant*

Led client supply chain improvement initiatives including strategic sourcing effectiveness assessments, commodity sourcing strategy development, and logistics warehouse network design. Facilitated client cross functional teams in developing and deploying lowest total cost sourcing strategies resulting in double digit cost reductions, customer service level enhancements, and knowledge transfer to client staff.

#### *World Class Manufacturing/Industrial/Project Engineer*

Developed advanced manufacturing and operational strategies as part of an internal consulting team focused on world class manufacturing, cost reduction and system redesign. Led “focused factory” plant layout, business process reengineering, and material cost and inventory reduction initiatives.
