- Management development

About The Phoenix Group

The Phoenix Group arose out of necessity. After decades of experience in the Michigan business environment, we realized a need still existed for honest, experienced professionals that put integrity above profits. An organization that would take the time to understand their clients and their needs. An organization that has no hidden agenda and does not take a kickback or referral fee from software vendors.

The Phoenix Group will provide you with professional services that exceed expectations. Whether you are our client, prospect, employee, contractor or vendor, we will treat you like a valued business partner... not a number but a neighbor.
